**Accounting Department Bench Marks**

The Department of Accounting aims to provide students with skills to study how the design, action and justification of accounting systems affect, and are affected by, individuals, organizations, markets and society. Accountancy is concerned with the provision and analysis of information for a variety of decision-making, accountability, managerial, regulatory, and resource allocation purposes. The Accounting programme produces students who will be able to:

- Show an essential knowledge and understanding of some of the contexts in which accounting operates.
- Analyze a range of accounting problems, provide a suitable rationale of the analysis, provide solutions through suitable text, diagrams, quantitative illustrations, simulations etc; and communicate effectively with peer groups about professional and accounting matters.
- Apply accounting knowledge in new and unfamiliar circumstances through a conceptual understanding of accounting practices. Apply financial and management accounting techniques to practical situations.
- Conduct an audit and prepare auditing report for different organizations.
- Demonstrate a basic knowledge and understanding of theories and empirical evidence concerning the effects of accounting in at least one of its contexts.
- Record and summarize basic transactions and other economic events and prepare financial statements complying in outline with relevant regulatory requirements.
- Analyze the operations of a business and perform financial analyses and projections at a basic level.
