Course Description

At this level, the student will be familiar with the basics of solutions dosage form, Students apply that knowledge to the pharmaceutical dosage forms and will be introduced to coarse dispersions (suspension and emulsion) , additionally this course provide the student with basic knowledge and understanding of the different types of interfaces, the term surface tension and interfacial tension and the mechanism of adsorption at interfaces, classifying the surface active agents and appreciating their application in pharmacy along with the basic knowledge of Rheology.

Course Learning Outcomes

Number	Outcome	Corresponding Program Outcomes	Corresponding Competencies
Knowledge			
K1	Defining and understanding the concepts of different types of liquid dosage forms (solution, suspensions, and emulsions).	K _P 1, K _P 6	C1, C6
K2	Discussing the different types of dosage forms and administration routes in relation with therapeutic outcomes.	K _P 1, K _P 6	C1, C6
K3	Explaining the physicochemical principles relevant to liquid pharmaceutical dosage forms.	K _P 1, K _P 6	C1, C6
K4	Understanding the concepts of Rheology and its application in pharmaceutical preparations.	K _P 1	C1
Skills			
S1	Compare various liquid preparations used in pharmaceutical dosage forms and assess their advantages and disadvantages.	S _P 1	C7
S2	Demonstrate capability of choosing the appropriate preparation method for a particular pharmaceutical product prescription compounding.	S _P 1, S _P 2, S _P 9	C7, C8, C15
S3	Demonstrate and apply physicochemical and biopharmaceutical concepts to interpret dosage form design.	S _P 2	C8
S4	Evaluate and solve incompatibility problems encountered in the preparation of liquid dosage form.	S _P 2, S _P 9	C8, C15

Learning Resources

Course Textbook	<ol style="list-style-type: none"> 1. Pharmaceutical Dosage Forms and Drug Delivery Systems by Loyd V. Allen, Jr & Howard C. Ansel, Lippincott Williams & Wilkins 10th Edition ,2014 2. Aulton's Pharmaceutics, The Design and Manufacture of Medicines, Edit.: Michael E. Aulton, Kevin M. G. Taylor Pub.: Churchill Livingstone, 4thedition, 2013.

Meetings and Subjects Timetable

Week	Topic	Learning Method*	Task	Learning Material
1	Course Syllabus 1. Pharmaceutical dosage form: <ul style="list-style-type: none"> ▪ Introduction dosage form and excipient ▪ Classification (physical form) ▪ Classification (route of administration) 	Lecture Flipped learning		Course Syllabus Textbooks
2	2. Pharmaceutical solutions <ul style="list-style-type: none"> ▪ Introduction ▪ Solvents and vehicles ▪ Preparation of solutions ▪ Formulation considerations 	Lecture Problem solving based learning	Short report	Textbooks
3	<ul style="list-style-type: none"> ▪ Oral solutions ▪ Syrups ▪ Elixirs ▪ Tinctures 	Lecture		Textbooks
4	<ul style="list-style-type: none"> ▪ Topical solutions ▪ Vaginal & Rectal ▪ Miscellaneous: ▪ Aromatic waters ▪ Spirits ▪ Colloidons 	Lecture Collaborative learning	Case study	Textbooks
5	3. Dispersed systems: Suspension: <ul style="list-style-type: none"> ▪ Surface tension phenomena and surfactants 	Lecture		
6	<ul style="list-style-type: none"> ▪ The mechanism of adsorption at interfaces 	Lecture		Textbooks
7	<ul style="list-style-type: none"> ▪ Suspensions Sedimentation rate ▪ Preparation of flocculated suspensions 	Lecture Problem solving based learning	Homework	
8	<ul style="list-style-type: none"> ▪ Wetting, flocculating, and suspending agents. 	Lecture		Textbooks
9	<ul style="list-style-type: none"> ▪ Sustained release suspensions ▪ Packaging and storage 	Lecture		
10	<ul style="list-style-type: none"> ▪ Pharmaceutical applications 	Lecture Collaborative learning	Case study	
11	Midterm Exam <ul style="list-style-type: none"> ▪ Rheology of suspensions 	Lecture		Textbooks
12	4. Dispersed systems: Emulsions:	Lecture		

	<ul style="list-style-type: none"> ▪ Types ▪ Tests for identification ▪ Purpose ▪ Preparation ▪ Emulsifiers and stabilizers 			
13	<ul style="list-style-type: none"> ▪ HLB method 	Lecture		
14	<ul style="list-style-type: none"> ▪ Microemulsions ▪ Methods of emulsion preparation 	Lecture Project based learning	Short presentation	
15	<ul style="list-style-type: none"> ▪ Stability of emulsions 	Lecture		Textbooks
16	Final Exam Week			

*Includes: lecture, flipped Class, project-based learning, problem solving based learning, collaboration learning

Course Contributing to Learner Skill Development

Using Technology
<ul style="list-style-type: none"> • Use pharmaceutical techniques to calculate and find correct answers to solve simple problems in compounding and dispensing. • Use pharmacopeia and references guidelines to develop processes, procedures, to produce pharmaceuticals of appropriate quality and quality assures them. • Read, evaluate, and interpret numerical, chemical and general scientific information. • Formulate significant research questions, design experiments, use appropriate chemical instrumentation, and analyze and interpret data. • Search and use the chemical literature in both printed and electronic formats.
Communication Skills
<ul style="list-style-type: none"> • Demonstrate ability to prepare relevant reports in a clear systematic way. • Be able to adapt and accommodate team working. • Access resources related to the description and application of the methods used for various unit operations.
Application of Concept Learnt
<ul style="list-style-type: none"> • Practical application of liquid dosage forms preparations and characterization in the corresponding practical course.

Assessment Methods and Grade Distribution

Assessment Methods	Grade	Assessment Time (Week No.)	Course Outcomes to be Assessed
Mid Term Exam	% 30	11th week	K1-K3, S1-S4
Term Works*	% 30	Continuous	S1-S4
Final Exam	% 40	16th week	K1-K4 S1- S4
Total	%100		

* Include: quizzes, in-class and out of class assignment, presentations, reports, videotaped assignment, group, or individual project.

Alignment of Course Outcomes with Learning and Assessment Methods

Number	Learning Outcomes	Corresponding Competencies	Learning Method*	Assessment Method**
Knowledge				
K1	Defining and understanding the concepts of different types of liquid dosage forms (solution, suspensions, and emulsions).	C1, C6	Lecture Problem solving based learning	Exam/Quiz questions in-class and out of class assignments

K2	Discussing the different types of dosage forms and administration routes in relation with therapeutic outcomes.	C1, C2	Lecture Flipped learning	Exam/Quiz questions videotaped assignments
K3	Explaining the physicochemical principles relevant to liquid pharmaceutical dosage forms.	C1, C6	Lecture	Exam/Quiz questions
K4	Understanding the concepts of Rheology and its application in pharmaceutical preparations.	C1	Lecture Problem solving based learning	Exam/Quiz questions Short report
Skills				
S1	Compare various liquid preparations used in pharmaceutical dosage forms and assess their advantages and disadvantages.	C7	Problem solving based learning Project-based learning Flipped learning	Exam/Quiz questions Presentation videotaped assignments
S2	Demonstrate capability of choosing the appropriate preparation method for a particular pharmaceutical product prescription compounding.	C7, C8, C15	Problem solving based learning Project based learning	Exam/Quiz questions in-class and out of class assignments
S3	Demonstrate and apply physicochemical and biopharmaceutical concepts to interpret dosage form design.	C8	Problem solving based learning Collaborative learning	Exam/Quiz questions Case study
S4	Evaluate and solve incompatibility problems encountered in the preparation of liquid dosage form.	C8, C15	Problem solving based learning	Exam/Quiz questions in-class and out of class assignments

*Include: lecture, flipped class, project-based learning, problem solving based learning, collaboration learning.

** Include: quizzes, in-class and out of class assignments, presentations, reports, videotaped assignments, group or individual projects.

Course Polices

Policy	Policy Requirements
Passing Grade	The minimum pass for the course is (50%) and the minimum final mark is (35%).
Missing Exams	<ul style="list-style-type: none"> Anyone absent from a declared semester exam without a sick or compulsive excuse accepted by the dean of the college that proposes the course, a zero mark shall be placed on that exam and calculated in his final mark. Anyone absent from a declared semester exam with a sick or

	<p>compulsive excuse accepted by the dean of the college that proposes the course must submit proof of his excuse within a week from the date of the excuse's disappearance, and in this case, the subject teacher must hold a compensation exam for the student.</p> <ul style="list-style-type: none"> • Anyone absent from a final exam with a sick excuse or a compulsive excuse accepted by the dean of the college that proposes the material must submit proof of his excuse within three days from the date of holding that exam.
Attendance	<p>The student is not allowed to be absent more than (15%) of the total hours prescribed for the course, which equates to six lecture days (n t) and seven lectures (days). If the student misses more than (15%) of the total hours prescribed for the course without a satisfactory or compulsive excuse accepted by the dean of the faculty, he is prohibited from taking the final exam and his result in that subject is considered (zero), but if the absence is due to illness or a compulsive excuse accepted by the dean of the college that The article is introduced, it is considered withdrawn from that article, and the provisions of withdrawal shall apply to it.</p>
Academic Integrity	<p>Philadelphia University pays special attention to the issue of academic integrity, and the penalties stipulated in the university's instructions are applied to those who are proven to have committed an act that violates academic integrity, such as cheating, plagiarism (academic theft), collusion, intellectual property rights.</p>
